

## Ashling Microsystems and SPA Computers announce distribution agreement for development tools

SPA Computers will supply Ashling Development Tools to its customers in India.

October 2008- Ashling Microsystems, a world leader in Embedded Software Development Tools and SPA Computers, a global leader in supplying Operating Systems to the Electronics industry, have announced a distribution agreement under which SPA Computers will supply Ashling's development tools to its customers in India.

Through SPA Computers, developers in India will benefit from a local specialized organization providing a state-of-the-art range of debug probes for ARM®, MIPS and ARC based applications. Ashling's exceptionally high performance (up to 3MByte/s download rate) and cost effective tools are ideal for today's complex embedded applications.

Ashling provides an extensive range of emulators, debuggers, and integrated development environments including essential run-time control and trace tools for a broad range of microprocessor cores. By applying Ashling's powerful real-time technology, users of the tools can benefit from a powerful, flexible and cost effective development and debug toolset.

"We are delighted to have concluded this distribution agreement," commented John Murphy, Managing Director of Ashling Microsystems. "SPA Computers are a highly respected end to end supplier of embedded solutions and we are looking forward to working closely with them to grow our business in India"

Srinivas Shekar, CEO of SPA Computers said "Ashling is a long established development tools company with a strong reputation for producing high quality products. Securing the Ashling distribution gives us the opportunity to provide our customers with state-of-the-art development tools at reasonable cost."

### **About Ashling Microsystems**

Ashling Microsystems is an international Embedded Software Development Tools company. Ashling is a subsidiary of the NeST Group, a broad based technology provider operating in the areas of software development, electronics design and manufacturing, optronics and fiber optics, broadband and RF solutions and power systems and magnetics. Through its close cooperation with leading semiconductor vendors, Ashling is a world leader in the Embedded Software Development Tools market. Ashling has development centres in Limerick, Ireland and Trivandrum, India and sales and support representatives worldwide.

### **About SPA Computers**

SPA Computers is a leading distributor of various products in the Indian Market and Embedded

Software and Hardware Design House with global Clientele. Through its highly skilled technical staff SPA Computers is able to service and retain its ever growing client list. SPA services the global clients through its office in India, Korea, Taiwan, Japan, Germany and United States.
